

flat cradle:

1. The material and structure of the life raft support are not limited.
2. The life raft shall ensure the fixation of the liferaft storage cylinder without axial turbulence and lateral rolling.
3. There should be a proper gap between the turning part and the fixing part of the life raft frame and between the rotating shaft and the shaft hole to ensure that the rotating parts of the life raft frame are not glued after being painted or painted with a small amount of long rust. If you die or rust, you can still flip it flexibly.
